

# XDOCS DEMO & DOCUMENTATION

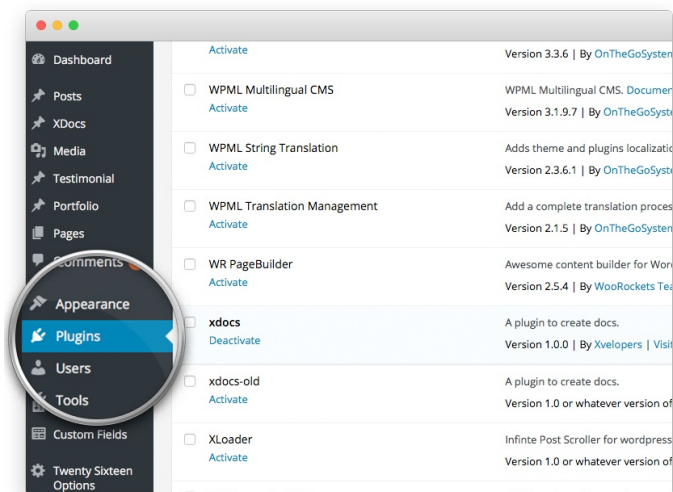

Version 1.0.0

Thank you for purchasing this plugin. We covered almost everything in this document that how easily you can create your own item's documentation. If you have any questions that are beyond the scope of this help file, please feel free to contact us. The above image in this section is a featured image. This plugin is using simple wordpress custom post format. So you can easily create multiple documents without installing extra wordpress. Xdocs is using its own theme system so you don't have to worry about current install or active theme. If you like this demo then this is going to be your default documents theme.

## Plugin INSTALLATIONS GUIDE

If You are using multisite wordPress then visit Network Admin area to install plugins.

Plugins menu in your WP administration.

There are two methods to install plugins in WordPress. You can choose any method you like. If you are getting any error while uploading plugin please use second method

### Installing from WordPress Dashboard

In **WordPress 2.7** and above you can **install plugins** directly from the admin area. Download the **plugin** to your computer, then log in to your WP admin area and go to **Plugins > Add New**. Browse to the **plugin** archive and select it. Then click **Install Now** and the **plugin** will be **installed** shortly.

### Installing Plugin Via FTP

To install a plugin you generally just need to put the plugin file into your 'wp-content/plugins' directory. Once a plugin is installed, you may activate it or deactivate it from the

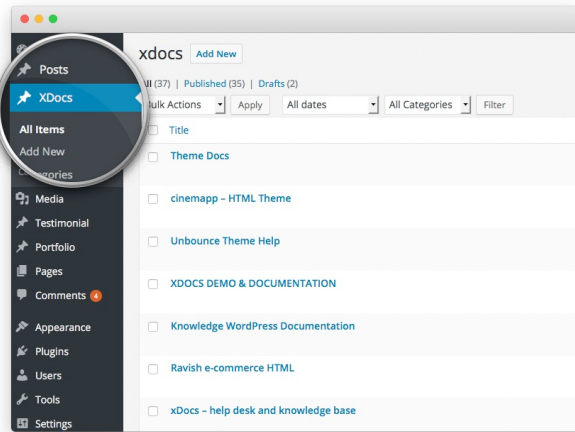

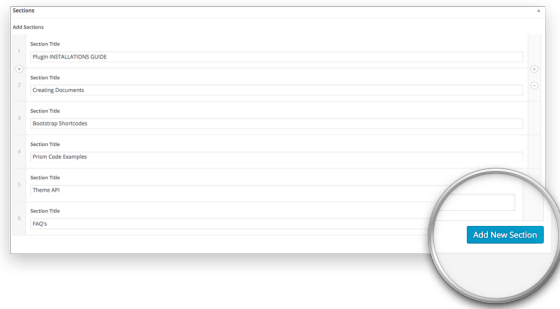

## Creating Documents

After installing and activating XDocs now you will be able to see XDocs in your WordPress dashboard menu. XDocs is using custom post type same as default posts to create documents but with some advanced options.

### Add New Post

- Click the XDocs tab.
- Click the Add New Sub Tab.
- Start filling in the blanks. You can use our Shortcodes!
- As needed, select a category and make other selections from the sections below the post. Each of these sections is explained below.
- When you are ready, click Publish.

### Sections

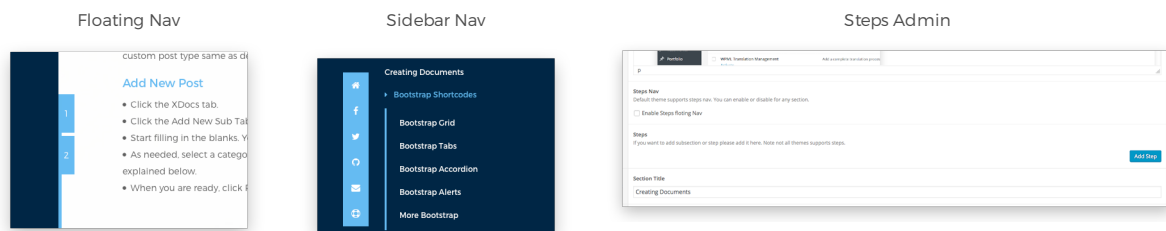

Each document can have multiple sections. New Sections can be added to post by clicking at "Add New Section"

### Introduction Section

Introduction section uses default title, content editor for short summary and featured image field for item image.

### Steps

You can also create Steps or subsections for any sections. Subsection title will be visible in main sidebar menu of this theme.

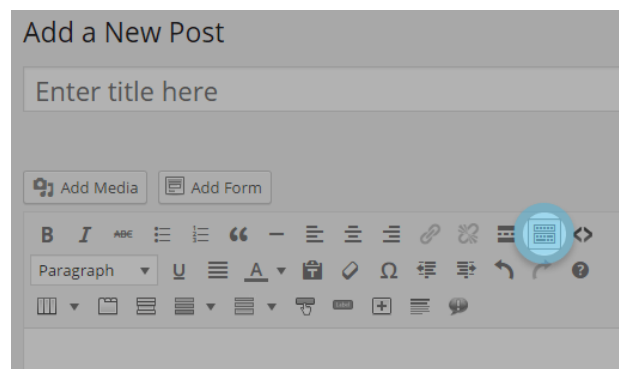

Note:- Not all themes support steps. Floating nav may not look good if you are going to add more than 4 or 5 steps

## Bootstrap Shortcodes

xdocs supports all major bootstrap elements. Bootstrap shortcodes are already integrated for you.

Enable the Bootstrap Shortcodes icons by toggling the Advanced Editor Toolbar.

Some Text

Tooltip

Thanks is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.

It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged.

This is a lead text and needs your attention.

Prism Code Examples

```
1 <!DOCTYPE html>
2 <html>
3   <head>
4     ...
5     <link href="themes/prism-ghcolors.css" rel="stylesheet" />
6   </head>
7   <body>
8     ...
9     <script src="prism.js"></script>
10  </body>
11 </html>
```

PHP Code

```
function xdocs_logo(){
    global $post_id;
    $logo = get_field('logo',$post_id);
    if( !empty($logo) ): ?>
        <div class="logo">
            " />
        </div>
    <?php endif;
}
```

Preloader Javascript

```
1 $(window).load(function() {
2     if( $(".xdocs-pre-loader").length ){
3         // Animate loader off screen
4         $(".xdocs-pre-loader").fadeOut("slow");
5     }
6 });
```

Theme API (Beta)

If you are looking to create custom theme for xdocs then you can easily create. We have created some sample theme for you. Theme API is still in

beta.

Xdocs using ACF (Advance custom fields) for meta fields. So you can also create custom fields as well.

## Functions

We have created some functions to make theme creation easy and fast. Here is list of available functions for xdocs. Functions are defined in themes/theme-functions.php

### Title

```
xdocs_the_title();
```

### Content

```
xdocs_the_content();
```

### Featured Image

```
xdocs_the_fetured_image();
```

### Preloader

```
xdocs_preloader();
```

### Logo

```
xdocs_logo();
```

### Version

```
xdocs_the_version();
```

### Quick Links

```
xdocs_the_quick_links();
```

### PRELOADER

```
xdocs_preloader();
```

## Actions

### xdocs\_head

```
xdocs_head();
```

### XDOCS\_Foot

```
xdocs_foot();
```

## Frequently Asked (FAQ's)

Can I create multiple documents?

Can I download documents?

Do I have to purchase license for each downloaded zip?

## XDocs Themes

This is default theme. There 2 more simple themes available. You can select your desire theme. Theme2 does not support steps and theme 3 does not support floating steps nav because of design requirements.

Xdocs theme default theme also have some color variations.

### Themes

#### Themes

General Options

Quick Links

Preloader

#### Select Theme

## Preloader Settings

XDocs also have preloader option with some simple flat loading gifs. You can enable or disable preloader if you want.

## Quicklinks

Quick links are some extra information. If you want to allow user to contact you.

## Version History (Changelog) Example

You can find the version history (changelog.txt) file on **yourthemename-full.zip** folder or you can check changelog on theme sale page.

Once again, thank you so much for purchasing this theme. As I said at the beginning, I'd be glad to help you if you have any questions relating to this theme. No guarantees, but I'll do my best to assist. If you have a more general question relating to the themes on ThemeForest, you might consider visiting the forums and asking your question in the "Item Discussion" section.
